PROFESSIONAL PROFILE

Production Planner with 6 years of experience in Supply Chain and production planning within the pharmaceutical industry at Fresenius Kabi Italia. Skilled in production planning, MRP (Material Requirements Planning), capacity planning, inventory management and material availability, with experience managing long-lead-time and single-source materials. Daily user of SAP (PP – Production Planning and MM – Materials Management modules), leading cross-functional planning meetings and contributing to corporate S&OP (Sales & Operations Planning) processes in English. Strong Operations mindset, with solid operational coordination skills and cross-functional collaboration across Production, Purchasing, Quality, Warehouse and Demand Planning. Focused on continuous improvement, process automation and data-driven decision-making.

PROFESSIONAL EXPERIENCE

Production Planner | Fresenius Kabi Italia

06/2020 – Present

Isola della Scala, Verona

- Short- and medium-term production planning for 7 production lines and a portfolio of approximately 150 SKUs (Stock Keeping Units), aligning demand, S&OP inputs and plant capacity while balancing workloads across production lines.
- Daily management of MRP (Material Requirements Planning) activities in SAP and Excel, monitoring requirements, inventory coverage, orders and material availability. Optimization of inventory levels and material availability in collaboration with Material Planning and Warehouse teams.
- Management of delivery delays and material shortages, including long-lead-time components (up to 12 months) and single-source materials, adapting the production plan, expediting deliveries with Purchasing/Material Planning and joining supplier meetings when required.
- Leading the weekly cross-functional planning meeting; participating in daily meetings on production line performance; preparing and presenting S&OP with the corporate team.
- Frequent communication in English with corporate colleagues and a weekly call with an international customer to discuss product availability and production plans.
- Operational coordination of the weighing team, organizing the activities of two operators and balancing workloads to ensure timely availability of formulas for production.
- Collaboration with Controlling on budgeting and forecasting activities, defining capacity, production volumes and required staffing/shift data.
- Creation and release of process orders in SAP ERP (Enterprise Resource Planning); management of key production master data, including BoMs (Bills of Materials) and master recipes; maintenance of MRP parameters in material master data (lead time, lot size, safety stock).
- Development of scheduling tools in Excel/VBA, reducing manual activities required to update the production schedule.
- Independent development, at the manager's request, of a production scheduling application (Gantt chart, multi-line management) with the support of Artificial Intelligence (AI) tools; currently used by production operators as an MVP (Minimum Viable Product), with new features and fixes released incrementally.
- Development of Power BI and Excel dashboards for KPI (Key Performance Indicator) monitoring.
- Previously (2023–2024), supported the implementation of SAP APO PP/DS (Advanced Planning and Optimization – Production Planning/Detailed Scheduling).

- Trained a colleague as backup Production Planner; internal point of reference for Excel and SAP PP, providing support to colleagues.

Quality & HSE | Sidel End of Line & Tunnels Solutions S.r.l.

10/2018 – 12/2019

Verona

- Definition and analysis of quality KPIs and CTQ (Critical to Quality) indicators to monitor quality performance.
- Management of internal and external non-conformities and implementation of corrective actions; development of PQPs (Product Quality Plans), control plans, checklists and SOPs (Standard Operating Procedures) for internal use and suppliers.

Internship – Process Improvement | Sidel End of Line & Tunnels Solutions S.r.l.

10/2016 – 05/2017

Verona

- End-to-end process mapping using VSM (Value Stream Mapping) to identify inefficiencies in the production flow, and design of a data collection system for statistical process control.

SKILLS

Technical Skills

- SAP: ERP (P11) – PP (Production Planning) and MM (Materials Management) modules; EWM – Extended Warehouse Management (P83); BI – Business Intelligence (P92); IBP – Integrated Business Planning; APO PP/DS (Advanced Planning and Optimization – Production Planning/Detailed Scheduling)
- MRP (Material Requirements Planning)
- Production master data management: BoMs (Bills of Materials) and master recipes
- Power BI and KPI reporting
- Advanced Microsoft Excel (VBA macros, Power Query), scheduling tool development, Word and PowerPoint
- Value Stream Mapping (VSM) and continuous process improvement

Soft Skills

- Operational team coordination and colleague training
- Cross-functional collaboration (Production, Purchasing, Quality, Warehouse, Demand Planning, Controlling)
- Communication and presentations at corporate level and with international customers
- Problem-solving and teamwork
- Continuous improvement and results orientation

EDUCATION

Master's Degree in Management Engineering

10/2011 – 07/2018

University of Padua

Thesis: "Lean Management Practices and Environmental Sustainability: An Empirical Analysis"

Technical High School Diploma – Information Technology

09/2006 – 07/2011

ITIS Guglielmo Marconi

LANGUAGES

Italian – Native

English – B2 level (frequent professional use)
